

Why FUTURA Smart?

FUTURA Smart – SAP sourcing, fast and easy

With FUTURA Smart, SAP S/4HANA becomes a comprehensive procurement suite. Companies gain control, efficiency, and future-proofing – without adding IT complexity. The solution integrates seamlessly into the existing SAP system landscape.

Go live in just 4 to 8 weeks.

Your advantages at a glance

100% SAP-COMPATIBLE

Identical business logic, no system discontinuity.

REAL-TIME INTEGRATION

Native connection to SAP S/4HANA for maximum speed and data quality.

INNOVATION INCLUDED

The first solution for Lean Services with Item Hierarchies and GAEB-compatible.

FAST GO-LIVE

Go live in 4–8 weeks instead of many months.

EFFICIENCY GAINS

Work up to 80% faster thanks to full access to SAP data.

EASY TO USE

Intuitive interface, minimal training required.

PROCUREMENT INTELLIGENCE

Data from SAP and FUTURA provides concrete decision-making insights for procurement.

CUSTOMIZED ANALYSES

Analyses, reports, and views can be quickly created to address specific questions.

Functional highlights

Supplier Lifecycle Management

Qualification & evaluation

Structured processes with utility analysis and scoring.

FUTURA supplier network

Access to over 100,000 suppliers and easy search for new vendors .

Sourcing Management

RFI – Requests for information

Structured market research with customizable questionnaires.

Questionnaires & rating matrix

Transparent supplier selection through a standardized rating matrix and Utility analysis.

RFQ – Requests for quotation

Standardized requests for quotation, quick comparison of quotations without Excel.

RFP – Requests for proposal

Multi-level processes – from identifying needs to final award.

E-Auctions – Real-time auctions

Dynamic pricing with maximum transparency.

GAEB-integration

Technical requests (construction & CAPEX) with Item Hierarchies and GAEB structures.

Procurement Intelligence

Directly integrated into the process

Analyses and reports are available right where decisions are made—without having to switch to another application.

Freely combinable capabilities

Individual capabilities can be flexibly combined and reused to create new decision-making foundations.

Plug & Play with SAP – ready for immediate use

FUTURA Smart operates directly within the SAP environment – without middleware or additional development. All procurement processes run on a unified data foundation, fully integrated and immediately productive.

Ready to use immediately: SAP-native business logic – 100% integrated into S/4HANA, with no media discontinuities.

Seamless processes: Real-time REST/OData services; data is immediately and directly available.

Consistent data: Uniform, audit-compliant information in the SAP standard.

Minimal IT effort: No in-house development, no interface projects, low maintenance.

High acceptance: Purchasers work within the familiar SAP logic with a modern user interface.

Added Value in practice – for purchasing, IT, and management

For purchasing:

Ready in days instead of weeks – Comparisons without Excel, intuitive workflows, high user acceptance. Scoring models.

For IT:

One system, one data model, Clean Core, standard OData services, no development. Audit-ready and governance-compliant.

For the management:

Informed decisions, transparent savings, and sustainable supplier selection – including CO₂ emissions.

**Futura
Solutions
well
integrated**
